

HOME OF THE AMAZING CLEANING PRODUCTS

~AMAZing Message~

2007 was a fantastic year for A-MAZ. Our company has doubled in size thanks to you—our loyal dealers. We remain committed to distributing our products to only small to mid-size professional dealers, which provides you with a unique product line the big box stores can't offer to the consumer. We will continue this marketing strategy as long as we grow and remain profitable. So far, so good!

For those of you who only sell our Water Stain Remover, we want to encourage you to look at our other great "green" products. Our Glass & Mirror cleaner is really becoming a big hit for obvious reasons and especially with the Glass Shops who want an alternative to the Spray Away product. Our non-aerosol bottle, with the 360 degree spray feature, is very popular. These unique features, plus the economics (less fluid required to clean) makes our Glass & Mirror Cleaner a value for your customers. Contact **Kim Evans** for a free bottle (one per dealer).

Thanks again for your business in 2007 and best of luck to you in 2008.

Warm Regards. *Sam*

New Products

We have several new products under development, one of which is simply a refill or economy size bottle of our Glass and Mirror Cleaner. We are just days away from announcing a new 68 oz. bottle designed to be light in weight and competitively priced. Our decision to use a lighter bottle was determined by the demographics in the USA. As the Baby boomers age, things are harder to hold, heavier to carry, and our hands don't function as well as when we were younger. So all our packaging is designed to be ergonomically correct. It may sound a little silly, but it isn't. If you have any comments or suggestions, please feel free to contact us at www.amaz.biz or call **Kim at 800-921-6861**

"The Green House"

As a member of the United States Green Building Counsel, we have been exposed to the most current developments regarding GREEN. We are so excited to see all the progress the GREEN movement is making and it is long overdue. A-MAZ is no different. We have embarked on improving the GREEN elements of the Water Stain Remover and are very close to making it even GREENER. With the development of new silicon based materials we will soon be able to offer more products that are both eco-friendly and "really work!" Stay tuned.

Updates from The Team

If you happen to be attending the Southern California Home & Garden Show in Anaheim August 20-24, stop by our booth in the new Greener Living Area, which will feature our company. When we attend a Home & Garden Show, we sell a "show special" to get our products in the hands of the attendees. But one thing we do which is really special and to your advantage is to hand out to every person who walks by our booth a listing of all our dealers in the area. Consumers really like this and it further legitimizes our presence and products. If you are in the area please stop by see us. Present this newsletter at our booth and claim your special gift prepared just for you. (one per person).

NEWSLETTER

Pointers from the Pro's

When selling the Water Stain Remover make sure to include the non-scratch nylon pad (The Gripper) to insure the customer is applying the product properly. The Water Stain Remover will not scratch glass, metal, or ceramic material...we guarantee it!

If the Water Stain Remover dries up, just add a little warm water and stir gently until paste is smooth.

The Auto Cleaner applied at full strength will remove road tar and tree sap from a vehicle. *It Really Works!*

~ Dealer of the Year ~
